Call for Keynote Paper Abstracts

IEEE Transactions on Computer-Aided Design is seeking suggestions for keynote papers to be published within the next 6-12 months. The purpose of a keynote paper is to provide a modern survey of the current state-of-the-art in the literature, present the most significant challenging problems in the field that need to be solved, and/or expand the field of Electronic Design Automation into new areas. If done well, a keynote paper will be widely read and widely cited for several years, providing an anchor reference in the field.

Historically, keynote papers have been invited by the TCAD editors, but now we are taking a more grass roots approach. We are inviting anyone to submit a one page title and abstract (include all co-authors) describing a proposed keynote paper. A committee of AEs will be formed to select the top 2-4 to be invited to submit keynote papers to TCAD. The papers will still be peer reviewed, but the authors should have confidence that the topic was pre-selected for a keynote for being relevant and timely. The deadline for submission is **January 1, 2018**.

Please submit your one page proposal by email to Sara Dailey at saradailey1@gmail.com.

Please note the following important date:
Submission Deadline: January 1, 2018
