

Call for Submission to:
The 5th IEEE World Forum on the Internet of Things – WFIoT2019
15th-18th April 2019
Limerick, Ireland

Theme: “IoT and the Digital Revolution”

Organized by the IEEE IoT Initiative with IEEE Multi-Society Sponsorship

The World Forum is the premier event for the IEEE IoT Initiative. The Forum brings together participants from industry, the public sector, the research community, and from end users of IoT Technologies. The objective of the event is a highly interactive conference to nurture the adoption of IoT for the benefit of Society. The event will be held and hosted on the beautiful campus of the University of Limerick. The extensive program for WFIoT2019 is seeking papers, submissions and suggestions that address the broad range of interest in IoT. The table and links below identify the components of the WFIoT2019 Program and the specific instructions for submission and the nature of the topics to be covered.

Event Component	Submissions for:	Attendance Characteristics	Link to Instructions	Important Deadlines
Technical Program Dealing with the latest original research, technology developments, and results important to IoT	1. Papers 2. Tutorials 3. Industry Sessions 4. Doctoral Symposium 5. Workshops 6. Special Sessions	The submissions for this portion of the program are intended for a research audience. The nature of the content is expected to be deeply technical in nature. The emphasis is on original and novel works.	CFP-Technical – http://wfiot2019.iot.ieee.org/authors-proposers/call-for-papers/call-for-technical-papers/	Ideas Nov 30th, 2018 Paper Submissions Dec 14th, 2018 Notifications Jan 25th, 2019 Final Submissions Feb 27th, 2019
Vertical and Topical Area Program Dealing with specific Industries and Subjects of importance to IoT. The focus is on deployable technologies, actual use cases and deployments.	1. Vertical Tracks 2. Topical Area Tracks	A general knowledgeable audience that includes industry, government, and academia focused on practical aspects of IoT. The majority of presentations for this portion of the program are by invitation and consist of Local, Regional, and Global leaders in IoT.	CFS-V&T Tracks – http://wfiot2019.iot.ieee.org/authors-proposers/call-for-proposals/call-for-vertical-and-topical-area-proposals/	Ideas Dec 14th, 2018 Paper Submissions Dec 14th, 2018 Notifications Jan 25th, 2019 Final Submissions Feb 27th, 2019
Entrepreneurial Program Dealing with the business aspects and value of IoT as well as the resources for entrepreneurs.	1. Entrepreneur Boot Camp 2. Start-up Competition 3. Entrepreneur Symposium	A general audience with an interest in the business aspects of IoT, consisting of individuals responsible for innovation within existing companies, or the art of starting new companies focused on IoT solutions and applications.	CFS-Entrepreneur - http://wfiot2019.iot.ieee.org/program/entrepreneurial-program/	Ideas Dec 14th, 2018

In addition to items that we are soliciting input for the WFIoT2019 Program also includes four other components. These are: 1) Plenary Sessions with presentations and panels from leading experts from around the world; A meet-up for Young Professionals interested in IoT, a special set of sessions for Women in Engineering; and an extensive Exhibits, Showcases and Demonstrations event.
