

IEEE Women in Engineering Webinar Series

UPCOMING WEBINARS

Monique J. Morrow

Karen Bartleson

Two Inspiring Webinars for your Professional Development

IEEE Women in Engineering (WIE) is bringing you two amazing webinars in December to guide, educate, and inspire you.

Benefit from the wisdom of those who have gone before us - paving a path for us to follow.

We invite you to register for these complimentary webinars.

Cultivating the Art of Persistence

4 December 2019

10:00 am ET

Presented by Monique Morrow

President and co-founder of the Humanized Internet and President of the VETRI Foundation

[Register for "Cultivating the Art of Persistence"](#)

Monique Morrow is a big thinker in technology and social good, leading efforts in the space on the global stage, guided by her own definition of the art of persistence. Her work operates at the intersection between blockchain technology, security-privacy issues, questions of legal jurisdiction, and portfolio development, which she exercises as President and Co-founder of the Humanized Internet. She is also President of the VETRI Foundation, which is building the future of a fair data economy.

Through her years as a woman working in technology, Monique crafted her meaning of persistence that involves both courage and compassion, authenticity and vulnerability. These themes are reflected in her TEDx Talks. If there is one takeaway from her talk, it will be to take concrete action to cultivate your own art of persistence and to be generous along the way.

Advice I Would Give My Younger Self

12 December 2019

11:00 am ET

Presented by Karen Bartleson

2017 President and CEO of IEEE

Karen Bartleson learned a few things along the way from her days working jobs paying below the legal minimum wage, to blazing a career path where she was often the only woman in the room, and leading herself and others to unarguable achievements. Karen had a 35-year career as an electronics engineer in the semiconductor industry, was an active IEEE volunteer for many years, becoming an IEEE Senior Member, and serving as President of IEEE in 2017.

Many of her life-work experiences can serve as important guides to success for women engineers today. Karen shares her experiences to help you prove yourself as an invaluable employee, a game-changing manager, or the person whose name is synonymous with success.

About IEEE WIE

IEEE Women in Engineering (WIE) is a global network of IEEE members and volunteers dedicated to promoting women engineers and scientists, and inspiring girls around the world to follow their academic interests in a career in engineering and science.

Our goal is to facilitate the recruitment and retention of women in technical disciplines globally. We envision a vibrant community of IEEE women and men collectively using their diverse talents to innovate for the benefit of humanity.

IEEE is the world's largest technical professional organization dedicated to advancing technology for the benefit of humanity.
